

METAL STAMPING SERVICES

Tryout, Die Repair, Production Support

MAJESTIC
A TOOLING TECH GROUP COMPANY

THE QUALITY YOU NEED. ON TIME, EVERY TIME.

RELY ON US DIE DESIGN THROUGH PRODUCTION

No company can afford wasted time or quality issues during product launches due to problematic tooling on the pressroom floor. At Tooling Tech Group (TTG), we have the resources to ensure your die will perform as intended, whether designed in-house by our team or from an outside vendor.

Specialists in the design and build of progressive and transfer stamping dies for the automotive and consumer industries, TTG has decades of experience and the right equipment to meet your metal stamping needs. We employ advanced design and simulation tools, as well as laser measurement technology that enables us to quickly identify tooling deformations and fix problems early in the manufacturing process. From there, we have stamping presses with in-die sensors and camera vision systems to inspect running parts at high speed and accuracy.

Capabilities

- Die design and build
- Die tryout
- Die repair
- Emergency offload
- Prototyping
- Short- and long-term production

Design and build of one die or a 40-die-package, we can handle the project from start to finish.

Dies are tried and tested in a production intent environment including feed rates, sensors, and scrap shedding capabilities.

We have production stamping capability for emergency offload, short- and long-term requirements.

Laser scanning services enables us to achieve quick dimensional accuracy during die design and repair.

Equipment

PRESSES

Press Make	Type (Prog/Transfer/Blanking/Tandem?)	Max Tonnage	Scrap Shed (Through Bolster or Shakers)	BED SIZE		Window Size (in)	SHUT HEIGHT	
				Front to Back (in)	Left to Right (in)		Min (in)	Max (in)
Eagle	Prog / Transfer	2750 tons	Drop thru Bolster	108	280	108	48	60
Eagle	Prog	1200 tons	Drop thru Bolster	108	216	74	33	44
Danly	Prog	1500 tons	Drop thru Bolster	96	188	74	38	48
Heim	Prog	800 tons	Shakers	60	144	42	30	42
Heim	Prog	800 tons	Shakers	70	144	53	31	42
Heim	Prog	500 tons	Shakers	48	100	32	20	34

COIL INFORMATION						SPM		Other
Stroke (in)	Max Coil Width (in)	Max Coil Thickness (in)	Max Coil Weight (lbs)	Coil ID (in)	Max Coil OD (in)	Minimum	Maximum	
36	72	0.38	50,000 lbs	20-24"	70	10	22	"Puller Linear Transfer"
16	72	0.25	30,000 lbs	20-24"	70	20	35	Puller
16	72	0.25	30,000 lbs	20-24"	70	20	35	
12	42	0.38	10,000 lbs	20-24"	60	15	35	
12	52	0.38	20,000 lbs	20-24"	60	15	40	
12	36	0.25	Line Die	20-24"	60	15	40	

MACHINE TOOLS

Model	Max. Table Travel (in)	Load Limit (lbs)	Controls	Machine Style
YCM DCV6030BF	216 x 102	55115	YCM FANUC	Bridgemill

COMPANY OVERVIEW

Founded in 1982, the Tooling Tech Group has grown organically, and through acquisition, to become the largest tooling provider in the United States with 650+ employees, 13 modern facilities and over 1 million square feet of manufacturing space across four states.

The depth and breadth of our capabilities is achieved through the combined experience of our company units, with each of these companies being in business for 30+ years, providing both extensive industry experience and financial stability that you can rely upon.

Our unique differentiator is the ability to provide all tooling services from design to engineering to simulation to machining to fabrication to try-out all within one company. This single source ability can help to streamline your business operations and simplify your life. As a vertically integrated company, we maintain tight control over quality and can provide custom services to meet your total program needs. We take full responsibility for quality, delivery, and cost management of each project starting at concept through “on time, every time” delivery.

Together, we have earned a reputation for manufacturing the highest quality tooling for casting, molding, forging and stamping. We also produce secondary automated solutions to transform parts into assemblies and functional products used around the world. We accomplish this by applying our expertise along with the latest technology, techniques, and CNC equipment to design, engineer, manufacture and test your tooling.
