TOOLINGTECH GROUP

QUALITY SERVICE, WHEN AND WHERE YOU NEED IT

IMPROVING EFFECTIVENESS AND ELIMINATING DOWNTIME

Tooling Tech Group's Automation Parts and Service Team is focused on providing cost-effective solutions that maintain your objectives and eliminate downtime. Our experience in the design and build of automated systems means we have both a broad and deep understanding of what it takes to keep your equipment running optimally. You can count on our team to provide you with practical maintenance programs, quality repairs, quick turn around time and competitive pricing that comes with full and complete warranties.

We proudly serve a variety of industries including, but not limited to:

- Aerospace
- Automotive
- Heavy Truck
- Household Appliance
- Lawn and Garden

TECHNICAL SUPPORT

- Remote diagnostics
- Technical documentation

FIELD SERVICE

- Machine audits
- Production run support
- Safety inspections

SPARE PARTS

- Identify/order genuine OEM replacement and spare parts
- Respond to emergency part failures
- Supply necessary product/parts documentation

PREVENTATIVE MAINTENANCE

- Address immediate issues
- Outline preventative actions to avert future problems
- Recommend upgrades to boost productivity

UPGRADES AND RETROFITS

- Adapt equipment to new requirements
- Improve production throughput
- Enhance safety features

TECHNICAL TRAINING

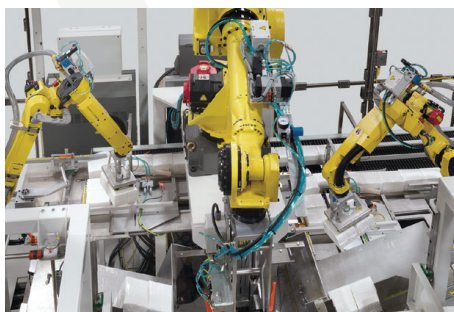

- Hands-on training at our facility and on-site
- Be production ready when equipment arrives on your floor

Our technicians can help you ramp up production and ensure a first part run is accomplished efficiently and effectively.

Our controls engineers adapt and upgrade equipment to meet new production requirements.

Our staff can identify and order genuine OEM replacement and spare parts at competitive prices.

We have the expertise to properly perform machine audits and identify issues before they become problems.

AUTOMATION EXPERTISE

COMPANY OVERVIEW

Tooling Tech Group (TTG) builds custom automated systems for assembly, joining and inspection as well as tooling for a variety of applications including thermoform molding, high compression composite molding, blow molding, rotational molding, die casting, and stamping. Industries served include automotive, appliance, lawn and garden, agricultural, aerospace, marine, and off-road vehicle industries, among others.

Originally founded in 1982, TTG has grown both organically and through acquisition to become the largest tooling provider in the United States. It has more than 600,000 combined square feet of manufacturing space, employs approximately 600 people and has a total of 12 locations across four states as well as a sales office in China.

The depth and breadth of our automation and tooling proficiency is achieved through the combined experience of our company units, with each having been in business for 30+ years. This provides both extensive industry knowledge and financial stability that you can rely upon.

As a vertically integrated company that provides everything from design to engineering to simulation to machining to fabrication to try-out, we maintain tight control over quality and can provide custom services to meet your total program needs. This single source ability can help to streamline your business operations and simplify your life. We take full responsibility for quality, delivery, and cost management of each project starting at concept through “on time, every time” delivery.
